

Maintenance of your furniture

Our products leave our workshop ready to use, no need for varnishing or special maintenance.

Our products are varnished with two layers of polyurethane varnish, a varnish that lets the wood breathe while being waterproof.

Wood is a natural material that moves according to the hydrometry. It is possible that small cracks may form depending on temperature variations. There is no need to worry, this phenomenon is totally normal and has no impact on the solidity of your furniture; most of the time, the cracks close by themselves. It is possible to fill the most preponderant ones with resin.

Our will is to create furniture to live, tables around which stories are created. Don't be afraid to spill a glass of water or wine on your solid wood top, just wipe with a damp cloth.

Recommendations:

- We recommend that you always use a trivet on your table tops
- Use a cutting board
- Avoid exposing the furniture to a source of excessive heat, such as a fireplace or wood stove. If you have any specific requirements in this regard, please do not hesitate to contact us.
